

B1 Usability Package:

- **Create** mandatory fields
- **Centralize** workflows and create shortcuts
- **Change** the layout of windows
- **Hide** fields not needed
- **Create** recurring invoices
- **And** much more...

B1 Usability Package is an add-on for SAP Business One aimed at making it a more smooth and easy platform to work with.

The package is very user-friendly and lets consultants carry out configuration tasks that were previously only possible for developers.

B1 Usability Package consists of a number of modules that can be turned on and off manually.

Our Usability Package increases customer happiness and makes their work with SAP Business One both faster and more efficient.

Current Modules:

Function Buttons:

Place custom buttons in every window in SBO and tie them to formatted searches or one of the 30 special functions provided, including the datalauncher that enables you to launch other programs with data-specific arguments.

B1 Validation System

Define triggers and conditions for activation of Universal Functions

Universal Functions

A set of function types that allows predefined functions to be assigned user-defined events

Global Exchange Rate

Online update of Exchange Rates via the ECB (European Central Bank)

Item Placement Tool:

Change the layout of every window in SBO, hide unused fields and place the user-defined fields from the UDF-side onto the main window.

Mandatory Fields:

Make any field in SBO mandatory to enhance data discipline and ensure data quality.

Default Data:

Set additional default data on Business Partner and/or Items to speed up the process when creating new master data.

Recurring Invoices:

Create template invoices for batch runs on scheduled dates to handle monthly/yearly contracts.

- History System
- From/To dates
- Support of Multi-currency Business Partners

Toolbox:

Collection of usability enhancements that can be turned on and off individually.

- Document line search
- Go to new master data
- Aut numbering of master data
- Flag-identifiers
- Chart of Account PDF Print
- And much more...

Account Balance:

Create account balance reports for customers/suppliers in PDF.

Letter Merge:

Merge data from Business Partners master data with Microsoft Word templates to enhance CRM.

Template System:

Create snapshots of current data for any window and store them as templates for easy creation of master data and executions of reports.

PLD Extensions:

Import and export report layouts to XML.

Boyum IT A/S was founded in 1997 and is based in Denmark. Since the outset, Boyum IT has supplied ERP systems to companies primarily within the fields of service and trade.

Function Buttons

Function Button Configuration

KeyOne, Denmark:

... Our customer's purchase of BIUP normally start with a simple wish to enhance the functionality in SAP Business One. The request have been everything between additional buttons to a complete banking module. After BIUP is installed and the customer sees the many other available functionalities they are delighted. Most customers only use a few functionalities at first, but quickly get into the other functionalities ...

BI-Net, United Kingdom:

... Binet is delighted with the Usability Toolkit from Boyum and the product is starting to make an impact in Business One sales in the UK market. The Mandatory Field function has proved to be very popular and the Function Buttons feature is a definite deal winner. However, the most popular and probably the most powerful feature is the Item Placement Tool. This has allowed a number of partners to progress in larger opportunities where they would otherwise have been ruled out. - Duncan Wyeth (Business Manager)

Stevenson Heating Ltd., United Kingdom:

... I have installed B1 Usability Package and I am very impressed with the range of options, I am sure my users will each find a part that helps them in their day to day tasks. Well done on a great add-on I have already got my supplier interested in seeing more - Paul Stevenson (owner)
